

PRE-SURGERY INFORMATION

If you are taking any medications that are on this list, they should be **stopped 14 days** (2 weeks) prior to your surgery date. Only Tylenol can be taken for pain. All other medication that you are currently taking, including vitamins, herbal supplements, or over the counter medications must be cleared by Dr. Meyers prior to your surgery. It is absolutely necessary that any of your current medication, legal or illegal drug use, or alcohol consumption be made aware of to Dr. Meyers and his staff.
